

# ProfileSelect™

## Your Applicants. Your System.

### Finding the Right Person Begins with a Consistent and Structured Process

With ProfileSelect, you gain the edge of having consistent procedures in place across the entire organization. Every application for a given job undergoes the same steps; every application that is discontinued is done so with consistent reason codes.

By incorporating the world's highest quality assessments, a full picture of the applicant is captured to ensure recruiters have the best information at hand, providing the highest productivity when considering the applicant.

Any one or more of our pre-employment assessments can be auto-scheduled with a workflow, all configured to your recruiting needs and the needs of the job.

*"ProfileSelect has streamlined our hiring process. We now have a consistent hiring process that is intuitive and has been widely accepted by our faculty and administration. Profiles' support staff has exhibited the right blend of technical and interpersonal skills to build a relationship with TSTC."*

— Rich Morris, Assistant Vice Chancellor,  
Texas State Technical College

### It's About Knowing What to do When

The Workflow Manager notifies whomever is responsible for each step along the way, such as to conduct an interview or extend an offer. Preconfigured emails ensure automated notifications to internal staff and to the applicants, for complete communication. All email content and subject lines are configurable.

#### Applicants are informed

At every step of the process, the applicant can see the status of their application. They receive emails at your preconfigured workflow steps, informing them when they need to do something like take an assessment. They also receive notification when the job is filled, if their application does not meet requirements, or if the company is applying them to a job.

#### Data on Demand

Synergistic searching combines both the hard skill and soft skill searching. Together this defines the total person, beyond what separate hard skill or soft skill searches could ever provide. Using assessment scores, skills, education and experience enables organizations to use the applicant database to the fullest, saving hours of time and finding the highest potential for the job.

#### Workflow Manager

# Fitting the Right Person to the Right Job

With ProfileSelect, assessments are completely integrated. The resulting placement reports provide employers with a complete set of suggested interview questions to consider for applicant fit evaluation. Succession planning and coaching reports are available at no extra cost.

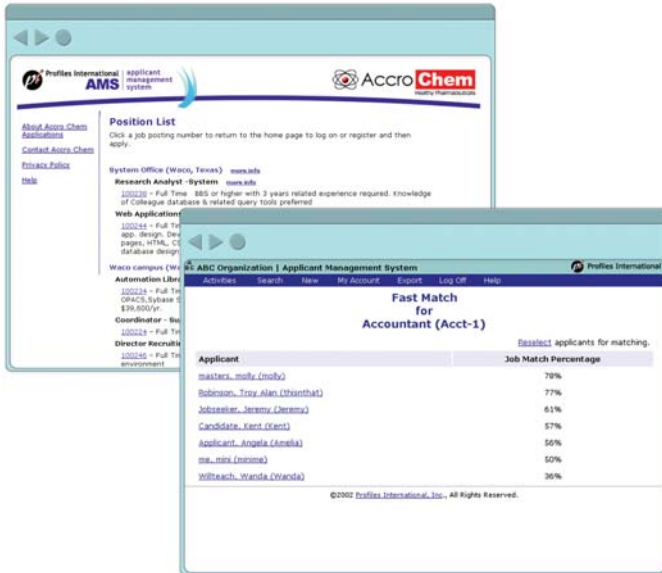

## Metrics-based reporting

Automatic and permission-based reports are available and include:

- EEO reporting by Position
- Job Postings Filled by Location and Position, including Cost of Hire
- Hire Source
- Job Postings over 90 days old
- Over 30 days to Fill
- Current Job Postings Status Report
- Job Postings Expiration by Date

Plus, application data and report data is fully exportable for further analysis or to be imported into HRIS systems.

*Applicants view and select job opportunities they would like to apply for.*

*Employers search for employment candidates based on hard and soft skills and job fit.*

**Assessments USA & Canada**

## Maintain Control

The entire system is permission-based with configurable roles and organization hierarchy to enable controls for:

- Requisition Management
- Qualifications Screening
- Reasons for Discontinuing Applications
- Point Scoring
- Offer Management
- Application Field Filters
- Custom Questions by Position
- ...and more!

## Your Applicants. Your System.

Job Seekers apply to your company from anywhere in the world via the Internet.
